

WORK BASED LEARNING AS INTEGRATED CURRICULUM

High quality education and training systems, which respond to the needs of the economy are the key to Europe making a successful transition to an inclusive, sustainable, knowledge based economy. European and many national policies are placing an increasing emphasis on involving employers and labour market institutions in the design and delivery of education programmes to help to attune curricula to current and emerging labour market needs and advance employability and entrepreneurship.

Work based learning as Integrated Curriculum

The Erasmus funded work-based learning as integrated curriculum (WBLIC) project draws on the latest research evidence and analysis from across Europe to identify common 'best practice' principles, and to develop a framework to guide programme planners seeking to engage with accredited work based learning using an integrated curriculum.

This Framework is being tested in different national contexts through a series of mini-conferences to be held later this year:

- Fachhochschule Technikum Wien, Austria (16 May 2013)
- Cracow University of Economics, Poland (4 June 2013)
- Czech Technical University in Prague, Czech Republic (6 June 2013)

To find out more about WBLIC or to register interest in these conferences visit www.wblic.org.uk
